

AMENDMENTS TO THE CLAIMS

1-20. (Cancelled)

21.(New) A spatial structure arranged for the spending of leisure, said structure comprising:

a first interior space separated from the ambient open air:

several at least partially closed separate spaces arranged for human activities within said first interior space,

wherein the geographical climate in each of said separate spaces is individually regulated in accordance with mutually differing geographical conditions.

22. (New) The structure of claim 21, wherein at least one of said separate spaces comprises a transparent wall for facilitating an observation of the interior of said separate space from the outside of said separate space.

23. (New) The structure of claim 21, wherein the geographical conditions in at least one of said separate spaces corresponds to the winter season of the Nordic or Arctic geographical areas.

24. (New) The structure of claim 23, wherein excess heat generated during a refrigeration of said at least one of said separate spaces is conducted for heating at least one other one of said separate spaces.

25. (New) The structure of claim 23, wherein said geographical conditions are regulated to imitate natural seasons at said geographical areas.
26. (New) The structure of claim 25, wherein said natural seasons to be imitated are one of winter or spring or summer or autumn as they appear in said geographical areas.
27. (New) The structure of claim 23, wherein at least one of said separate spaces includes at least one of natural plants or artificial plants or natural animals or geographically related structures providing experiences of art or geographical awareness.
28. (New) The structure of claim 21, further comprising:
- a first cupola defining said first interior space;
 - a second cupola defining an interior space and spaced from the first cupola;
 - an enclosed slope extending from the first cupola to the second cupola, the slope having an upper end accessible from the first cupola and a lower end accessible from the second cupola.
29. (New) The structure of claim 28, wherein the slope curves as it extends from the upper end to the lower end.
30. (New) The structure of claim 28, further comprising a lift in the first cupola, the lift leading to the upper end of the slope.

31. (New) The structure of claim 28, further comprising a refrigerated field in the first cupola.
32. (New) The structure of claim 28, further comprising a restaurant between the first and second cupola.
